

1. They were simple and easy, but important practices. First time tried W3schools.
2. **ID** can be used to identify one element, whereas a **class** can be used to identify more than one.
3. Easier to update, much simpler code, more formatting options.  
<https://www.free-css.com/template-categories/gallery>
4. The latest version is W3.CSS 4.15 December 2020.
5. No, it isn't bad to practice inline styling. It is used in older websites, CMS content etc.
  - a) `<p style="font-size:12px;color:black;">Some text</p>`
  - b) `<style type="text/css">`  
`p{font-size:12px;color:#000;}`  
`</style></head></body>`  
`<p>Some text</p>`
6. With chrome dev tools you can test and try different changes and see the result directly  
 ySlow analyzes websites and why they are slow.
6. `<!--[if lt IE 7]>`  
`<link rel="stylesheet" type="text/css" media="screen" href="path/to/ie.css" />`  
`<![endif]-->`
7. CSS Compressor is used to compress CSS files to increase loading speed of website.
8. By compressing the **CSS**, you can reduce the size of the **CSS** file and increase the performance of your website.

9.

```
<style>

    table, tr, td {
        border: 5px solid burlywood;
        background-color: rgb(241, 251, 252);
        padding: 20px;
        color: cornflowerblue;
        text-align: center;
    }

</style>
```

10.

```
input[type=text], select, textarea {
    width: 80%;
    padding: 10px;
    border: 1px solid rgb(110, 93, 93);
    border-radius: 4px;
    box-sizing: border-box;
    margin-top: 6px;
    margin-bottom: 16px;
}
```
